

CORRECTOR COLORS

When talking about PermaBlend's corrector colors, we have put together a series of four. PermaBlend's colors are not dependent on modifiers, this is why we do not have a modifier series. We created the corrector series to correct the brows you will have coming in NOT done with PermaBlend.

When we talk about correcting or neutralizing what we are working with, we mean, one color used in combination with another to neutralize the existing color.

Soft Yellow Corrector:

This color can be used to correct violet, purple or blue brows.

Pumpkin and Golden Corrector:

Can be used to correct blue-gray brows. The reason for both colors is just in the intensity of the grays you are dealing with.

Olive Corrector:

Can be used to correct red, orange or pink brows
